**Rise to the Int'l Anti-Imperialist  
United Struggle on Oct. & Nov. !  
Stop the Prime Minister Sato's  
Visiting to U.S.A. !**

# Contention

Rise to the international anti-imperialist united action in October and November for smashing down NATO and Japan-U.S. Security Treaty, for the victory of the Vietnamese Revolution, and for the dissolution of the Warsaw Pact Army!

Fighting labor and people all over the world! The world order of the imperialism, now accumulating an enormous contradiction, is trying to prolong its life by extension of the violent suppression (invasion, suppression, counter-revolution) against us-suppressed class.

That is, the imperialistic World Powers are making invasion upon "the third world", and are increasing military forces of counter-revolution against people's struggles for the liberation of nations and socialism revolution. Within their own countries, they are switching over to Fascism control over workers and people.

This is an expression of crisis of the imperialism. It is a crisis of the imperialism produced by growth of revolutionary war in Vietnam and other "third world", and by intensification of the struggles for repartition of markets among the imperialistic World Powers.

The struggles of the suppressed people all over the world to this crisis of the imperialism and its violent suppression are increasing and smashing the control with people's organized violence.

The anti-imperialist struggle of suppressed people all over the world, in spite of the third world's people's revolutionary war, whose height is Vietnam, is assuming the front for being behind of the struggles in the imperialistic nations, is facing difficulties. And this makes third world's people's revolutionary war enormously difficult. The difficulties of struggles in imperialistic nations are based upon actual conditions more than general conditions like the bribery of the people by imperialistic superprofit (formation of the labor aristocracy), enormous development of the powers' mechanism suppressing people. The actual conditions, one is the counter-revolutionary alliances of the imperialism, (which are NATO, Japan-US Security Treaty, etc.) another is the transaction between Stalinism (opportunism) and imperialism, are making us face the problem how to smash them.

The counter-revolutionary alliances are provided by the followings. One is that, in modern transitional world, the each imperialistic World Power cannot unify invasion and counter-revolution by itself, and can not make its own world strategy.

Another is the quality of modern high level of world suppressed people's struggles. That is, the imperialistic World Powers, including mutual contradictions, cannot stop uniting themselves before the development of proletarian world revolution.

But the unbalanced development of imperialistic World Powers, and the intensification of the struggle for the repartition of market, on the one hand make imperialists strengthen the armament and squeezing, suppression, and on the other hand make counter-revolutionary alliances reorganized and strengthen.

Hence anti-imperialist struggles all over the world have to confront the reorganization and the strengthening of counter-revolutionary alliances, especially of NATO-ANPO and its interior control form which is an attack of Fascism. It is a main mechanism of imperialistic world control, and in its reorganization the crisis of imperialism exists. The reorganization of counter-revolutionary alliances appears as Fascism in the domestic control but throughout the world it has the direction toward the struggle for repartition of market and to blocking up among powers. With extension of violence of imperialistic power, this appears as an ideological attack of chauvinism and nationalism. Then it is demanded that proletariat-suppressed people fight against the reorganization of counter-revolutionary alliance. That is, through the proletariat an international struggle for smashing down the counter-revolutionary alliances among imperialists, we have to develop international solidarity aiming at simultaneous defeat the imperialistic World Powers.

The reorganizations of the counter-revolutionary alliances among imperialistic World Powers and the power structure toward Fascism are not only the expression of the governing class crisis, but also the crisis of suppressed people all over the world. That is, class crisis is becoming throughout the world, the struggle between Fascism of imperialists and proletarian dictatorship.

The situation as "transactions" between "Stalinism" (opportunism) including Soviet Union and imperialism is opportunists' treachery who are blind to this confrontation between Fascism and proletarian dictatorship and an attack of imperialists, trying to conceal the confrontation, against proletariat.

We-Communist League will set the term from 21st October to the day of Sato's visiting U.S. in Nov. as the first stage of the ANPO-decisive battle in Japan, will crash the violent mechanism of the authorities at the risk of our whole organization, and will fight for overthrow of Japanese imperialism and for world revolutionary war. Rise to the struggle of crashing NATO-ANPO all over the world!!

## Towards Oct. 21 int'l struggle

---- OUR OCT. 21 STRUGGLE

SMASHES SATO'S IMPERIALIST GOV'T----

### (1) ANPO Decisive Struggle Already Started.

ANPO Decisive Struggle has already started.

Japanese imperialism passed the University Bill and by this immediately started its all-out attack against university fortresses.

Nowadays, we have not a single day when the task force does not rush into university.

Moreover, with the arrests of two hundred Waseda University activists as its beginning massive arrest attack against activists has been practiced in rapid succession without any regard to the charge alleged. In metropolitan Tokyo area, everyday witnesses activists arrested.

In fact ANPO Decisive Struggle has started with the power's preceeding all-out attack against us.

We have cut our way through ANPO Struggle with "organized violence" since the Oct. 8, and now is the time for us to win the ANPO Decisive Struggle and thereby to pursue an advanced class decisive struggle with whole gains and learnings brought about thus far.

Furthermore, we consider this shift from ANPO Decisive Struggle, i.e. an unexplored haul of Japanese class struggle to real armed struggle, not as the one of our own nation but as the one of the chains of international anti-imperialist struggle, and above all as a vital protrusion of the struggle in order to develop and lead class struggle in advanced nations into class war--revolutionary war.

Class struggle of new quality, which is now being formed as the result of Vietnamese people's heroic revolutionary war, has spread over, not mentioning to backward nations, advanced nations in such armed struggle--revolutionary war as Black Revolt in the U.S. and French "May Revolution", and ANPO Struggle has been formed and developed with such an international impact and prescription.

We proposed last year such integral slogans as "Smash ANPO & NATO!", "Victory for the Vietnamese Revolution" and "Crush the Warsaw Pact!" and did much in integrating the international anti-imperialist struggle of class struggle of new quality. And international class struggle during the course of a year up to now will test the validity of our internationalism and will require more initiative haul as well.

The presence of international counter-revolutionary alliance among imperialism was to give chance for world class struggle newly to advance. As is already well known, the development of contradiction among imperialisms, the counter-revolutionary alliance being its issue, appears at the first glance as "disintegrity of invasion and counter-revolution" but is the reorganization of the counter-revolutionary alliance resolving this contradiction.

That is to say, invasion by imperialisms in the world under transition immediately intensifies class struggle for world revolution, by which the counter-revolutionary alliance among imperialism is strengthened in order to crush proletariat world revolution; while the presence of the counter-revolutionary alliance becomes the fetters for the unification of the workers and peoples under invasional policy pursued by the imperialist Powers. This theoretical "inconsistency" between

(continued on p.3)

"invasion" and "counter-revolution" in the world under transition leads itself, in reality, to "reorganization of counter-revolutionally alliance".

The class significance of "Smash NATO & ANPO!" lies in liquidating the counter-revolutionary alliance and in leading international class struggle into the one of higher quality, by our struggle right in front against this imperialist counter-revolutionary alliance and its reorganization.

The next period after this reorganization of counter-revolutionary alliance is the very period for World revolutionary war.

## (2) ANPO Decisive Struggle & Trends of Int'l Class Struggle

Revolutionary left in Europe such as West German SDS and French JCR are planning the Oct.14 Anti-Vietnamese War--Anti-NATO Rally in Paris on the one hand, and in the U.S. on the other, the Oct.11 National Rally for Anti-Vietnamese War (sponsored by SDS in Chicago) and Nov.14 Struggle for Anti-Vietnamese War and Anti-ANPO (sponsored by SMC in Washington) are scheduled. These basic trends of international class struggle, including Czech re-upheaval, is an just guarantee of higher advance uplift in terms of our proposals.

Just like Japanese ANPO Struggle has developed with such interreactionality as the uplift of it simultaneously has brought about struggles against any imperialist domestic reorganization, which in turn won an enlarged base and power of Anxx Struggle; class struggle in Europe and the U.S. has been also forming its base with Anti-NATO--Anti-Vietnamese War as its climax.

Railway workers in France striked for seven days from September 7 and paralysed 80 per cent of the whole French railways and this great militancy is tremendously influencing workers in electric power industry, gas industry, subway, postal and telephone service etc.. This made the bourgeoisie re-seized by the horror of the "May".

In Italy, after the millions of workers going into strike in metal industry, 660 thousand workers in construction industry striked for 48 hours and a "crisis" is openly whispered with party multipolarization and unstbility of the present power all together.

The radical total social upheaval in France and Italy could not but give impact on West German workers, through which the wildcat strikes, first from among steel industry workers in Ruhr, attacked next in Saar, Bremen and Kiel and developed from steel industry to coal industry and moreover to whole industries. They, after all, paralysed the West German an economic life. They not merely radically shook West German imperialism but also rapidly weakened dominance over workers by SPD and its labor union DBG which is the left supplement of West German imperialist system.

Although ANPO Decisive Struggle aims at stopping Sato from visiting the U.S.--"Smash Sato's imperialist Government!"; it corresponds, more comprehensively, to international anti-imperialist struggle inevitable for marching forward toward international simultaneous revolution and international proletarian dictatorship.

## (3) "People's Front Faction" Destined to Collapse

Liberal Democratic Party hints at December dissolution of the Diet and began its plot to split People's Front Faction and Proletarian Dictatorship Faction. It is December dissolution that barely helps the JSP-JCP maintain its prestige which, in order to escape ANPO Decisive Struggle concentrated to Anti-Sato's Visit to the U.S., switched already its slogan from "Stop Sato from Visiting the U.S.!" to "Protest (in fact, cheer) by demonstration against (for it)!"

JSP is flurried by December dissolution, because it is too much clear that JSP, succeeding its defeat in Tokyo Metropolitan Congressional Election, is to lose in post-ANPO Decisive General Election, while JCP wants to make great forward strides, eating up JSP's ballots. With all its troubling discussions on Anti-War Youth Committee, Soohyoo set its policy for this autumn, which proposes the Oct.13 Korokyo (Council of Trade Unions of Public Service Workers)'s one hour strike. Soohyoo, with Hansen (i.e., Anti-War Youth committee) as its element, is pressed into a position where it must organize some struggle. And Kankoro (Governmental and Public Service Trade Unions) organizationally slacks itself by the coming up Hansen from the bottom and by the intervention rightist to labor movement, and faces a disorganizational crisis.

Why is this modern People's Front Faction inevitably involved in imperialist state power? Because it fails to understand imperialist invasion, counter-revolution and oppression preceeding in the form of reorganization of the counter-revolutionary alliance. And especially because it should claim, if any variation of shade of difference, the return of Okinawa bases which Japanese imperialism regards as the cornerstone for its invasion into Asia. By continuing negotiations with the U.S. on Okinawa's reversion, Japanese imperialism, in this sense, plots to split Proletarian Dictatorship Faction and People's Front Faction and to win the latter into its world strategy.

Above all, Japanese imperialism is going to make People's Front Faction and Fascist Faction elements of its line in order to isolate Proletarian Dictatorship Faction; and partially involving the workers' class as ruling class as a whole, to form its own market in Asian-Pacific area.

We have already proposed anti-imperialist united front and labor movement oriented by high class consciousness, i.e., the line in which we disorganize the JSP-JCP coalition (People's Front Faction) from the bottom.

In ANPO Decisive Struggle this Autumn, we should realize the Soviet Movement through the struggle against central state power and mass strike; we should show up ourselves as Proletarian Dictatorship Faction; and we should thereby split People's Front Faction, imperialist state power and Fascist Faction. And it is needless to say that its tactical key is "Stop Sato's visit to the U.S. by force!".

The reorganization of National Hansen and Hansen in Tokyo District on its way, since Hansens have not been arranged as guidance organ although they have really existed and worked sect-like or pragmatic way.

Evident issue for us was the national arrangements of Anti-War Youth Committees all over Japan as independent organ for political struggle on the one hand, and a formation of a united front among parties on the other. And it is ironical that the issue of the "reconstruction of National Hansen" is suggested exactly when a leap of the struggle by the already substantiated Anti-War Youth Committees is necessiated. Only when a movement has been already matured and is going to develop and transform itself into another, snobs can recognize its existence.

The practical process of this "reconstruction" began with JSP's decision to expel Hansen with three Factions all together. Hansen without the so-called three Factions cannot exist; therefore "leadership" of National Hansen (such as "Initiative & Reform," i.e., an opposition faction inside JSP which integrates itself around the magazine "Initiative and Reform"; and Base, i.e., a faction split out of the Socialist Youth League Liberation Faction.) are at the verge of which to choose, JSP or district Hansen. Thus, the leadership of National Hansen decided to "reconstruct" itself and tries to

"reconstruct" itself as compania organization including People's Front Faction, while accepting independency of district Hansen. The Sept.15 struggle was resolved and initiated as a compania for the reconstruction of National Hansen with district Hansens. And Aokai (Socialist Youth League Liberation Faction), Front (United Socialist League), and Kakumal (Japanese Revolutionary Communist League Revolutionary Marxist Faction) are coming near to the former six Factions (namely, the Communist League, ML, Chukaku, CWP, SWL, and Fourth Intl.) Thus, ANPO Decisive Struggle being near at hand, anti-imperialist united front has organizationally fixed its practical power so far won. That is to say, with the united front among parties at center, as National Zenkyoto (Campus All-Joint Struggle Committee) on student front, and as National Hansen on worker's front, compania organizations have been formed.

The militant corp exist as hauling troop of this anti-imperialist united front.

However, important is the fact that the reorganizational process of this united front is not carried out by our, Chukaku's and ML's hegemony (mainly in the field of political line), but is being formed spontaneously, i.e., as the result of accomplishments thus far, and the fact that the united front is not being recognized in the quality necessary to fight ANPO Decisive Struggle to the end.

Therefore, the necessary conditions for the victory of ANPO Decisive Struggle remains unmet and is up to activities from now on, although the compania organization for ANPO Decisive Struggle is being formed.

These circumstances are brought about by the burden of our task as revolutionally leftists in ANPO Decisive Struggle; i.e., ANPO Decisive Struggle as the very turning point of Japanese revolutionary movement. And the sharp question put to parties and factions is whether a prospect toward revolution can be suggested, or whether the validity of their revolutionary lines and their substantialization can be guaranteed.

Two tendencies would ensure if revolutionary strategy is neglected for the reason that the abovesaid burden is too hard. The one is the tendency we can find in Progun (Proletarian Military Groupe), ML, and the Red Army faction (which suggests an armed uprising this autumn and is expelled from the Communist League, for it has sold the Chairman of our League to the imperialist power ignoring the objective conditions.) who claim Party Military Groupe through direct application of learning from revolutionary wars in backward nations. The other is the People's Front leftist tendency we can find in Chukaku and Kyoro (Communist Workers Party) etc. We should clarify that no matter hard our task the path to revolution can exist only where these two tendencies are overcome.

It is because simple guerrilla warfare will be crushed by the power on the one hand and people's Front leftist movement's quality cannot but still remain nothing all with its

mere quantitative increase on the other hand.

The present surroundings is not the one in which lack of leadership of parties and factions would cause disappearance of mass uplift. Rather, mass uplift will continue to enlarge. The concentration of the mass of more than ten thousands to the Sept. 5th. National Zenkyoto Rally proves this. Nevertheless, we cannot expect the victory of ANPO decisive struggle simply taking this greatest uplift into consideration.

Now is the day for us to enhance our tactics for ANPO decisive struggle this autumn. Qualitative transition of class struggle must be won by tactics in decisive aspect and the tactical problem for this autumn has such important significance as to shake the bases of parties and faction at present stage.

#### (4) The Vital Oct.21 Struggle

ANPO Decisive Struggle is the one on which the revolutionary leftists' total gain through ANPO Struggle not merely from Oct.8 this year but also from '60 up to now is bet and on which the life of revolutionary left itself is bet.

The very question faces us---- whether Japanese class struggle can come up above the markedly important horizon or whether revolutionary left, with our League at its core, is historically defeated.

As we have already clarified several times, our strategic tactical prospect lies not in mobilizing at Haneda Airport for stopping Sato visiting the State, but in creating governmental -- political crisis in which Sato is incapable of visiting the State.

More concretely, it is the march forward the Oct. 21 armed struggle for central power through the offensive and defensive fight at university fortresses-- ANPO fortresses, and is the winning of the firmly integrated will of the anti-imperialist united front at the Oct.10 Half Million Central Rally for stopping Sato's visiting the USA, and is the armed march forward toward the Oct.21 on all fronts.

How to struggle the Oct.21? Putting aside this question, we cannot discuss things after that.

Pig's counter-revolution as preceeding preventive counter-revolution has already started, and we, of course, must concretely clarify when to go on an all-out attack and where to recognize the turning point of offence and defence, while reject-

ing such rigidity as to make one-to-one correspondence sharelly crying "Decisive Struggle!" "Decisive Struggle!".

We clearly set the markedly important turning point or when to rush into the all-out decisive struggle on when accomplishment and victory of the Oct.21 struggle for Central Power and Armed Mass Strike are achieved.

Still at present, there is part in revolutionary left which merely shout "Decisive Struggle!" or can grasp ANPO Decisive Struggle only in general terms as "November Decisive Struggle" when Sato is scheduled to leave for the U.S.

But such a way of thinking as to neglect the firmly devoted preparation for the Oct.21 and to set the struggle begin only in November when Sato leaves for the US is a product of disqualified leftists who sti;; cannot have practical prospect for ANPO Decisive Struggle as a mere riot.

Our League will carry out the Oct.21 Struggle as revolutionary struggle and as the accomplishment of the Armed Struggle for Central Power and the Armed Mass Strike.

Armed debouchment and seizure of Kasumigaseki in the capital and corresponding mass strikes in main places of Japan, especially at Osaka Central Telegraph Office; these will fire the first shot of the all-out attack in ANPO Decisive Struggle. Militant youth worker comrades and student comrades!

Make the Oct.21 the Breakthrough for Smashing Sato's Imperialist Gov't and Stopping Sato's visiting the U.S.!

Defend University Fortresses Armed Base to the last for the Oct. 21 Armed Struggle for Central Power and Armed Mass Strike!

Smash radically the task Force i.e., the soldiers of Japanese imperialist counter-revolutionary violence by armed struggle of millions all over Japan with the Oct.21 Armed Struggle for Central Power at its Climax for the tremendous Armed March of smashing Sato's Cabinet and Stopping Sato's visiting the US A!

Organize Armed Action Troops of Zenkyoto for the Oct.21!

Organize Armed Action Troops of Hansen for the Oct.21!

Our League will haul the Oct.21 Struggle with all its effort and will open the present of the victory of ANPO Decisive Struggle.

# *struggle struggle struggle*

## **- 8.17. - Heroic fight of Hiroshima Univ students**

On August 17th, just the day that U.C.L. was enforced, it was Hiroshima University which was the base of the student movement of Western Japan that was attacked by crazy fangs of the state power.

In the gray of the morning of 17th, Hiroshima University was surrounded by thirty armed motorcars, drainpipe motorcars and twenty hundreds silver duralumin shields. With this violent menace for background, pigs ordered students out of the campus. But twenty-nine members of the most revolutionary students of Hiroshima University, in resistance of the order for departure, was besieged in the central building of Hiroshima University and the offensive and defensive battle begun. In spite of several thousands shots of gas bombs and drainpipe of the riot police, the most heroic comrades made counterattacks with Morotov cocktails, stones and indomitable fighting spirits to defend their base to the last. In concert with the heroic fight of forlorn hopes, out of the gate of the campus, several thousands of fighting students, workers and citizens fought against the riot police and developed a street fighting. Fighting of the comrades in and out of the campus continued till the evening of the 17th, the riot police could not help interrupt their crazy attack at seven in the evening. But, in the next dawn, the riot police, reinforcing new units, began their attack to the building again. Though forlorn hopes made a defence more heroically than the day before, at two in the evening of 18th, the central building was recaptured by the riot police. And twenty-nine comrades was assaulted and arrested.

However, this desperate defence fight for thirty-five hours of Hiroshima University was the most heroic one that encouraged all comrades in Japan, for whom it should be inevitable to confront directly the crazy power of imperialists before the ANPO decisive struggle in this Autumn.

## **- 9.3. -**

## **Battle at Waseda Univ.**

About 6.30 in the morning of Sept.3 2000 riot police completely armed with the mechanical troop were collected in front of the main gate of Waseda Univ. and at the same time whole Waseda was placed under martial condition. At 7.00, the counter-revolutionary storming troop shot hundreds of gas all at once and started to destroy our barricades, the picked 27 death-defying comrades, who shut themselves in the 9th floor and on the roof of the student union building, threw fire-bottles and stones to the riot police, hang up the flag, attacked even the helicopters, and bravely expressed their intention to thoroughly fight against them.

At 9.00, even after Kakumaru in Okuma auditorium surrendered, on the roof of student union building and the road near there such exchanges as throwing stones and collected shot of gas, anybody around could hardly open his eyes. At 10.00, about 500 members of Zenkyoto of Waseda started from Takatanobaba station claiming return to their campus, and they rushed into their campus, fought guerilla battle against riot police, and 87 of them were arrested.

At noon they attacked them from three sides at the same time, such as a troop came up inner stairs to destroy barricades, helicopters scattered teared liquid, and a troop attacked them from the road with high-pressure water drain and teared gas shot, all of the death-defying comrades were forced to come up to the elevator stage on the roof and waving their own party's flags or Zenkyoto's flags and singing the song of "International" they were handcuffed.

All of them were sent to the prosecutor because of the suspicion of an attempted incendiarism and murder, the university authority locked out three buildings and Waseda campus temporarily seemed to be still. But this revolutionary ardent fight and guerilla battle by Waseda Zenkyoto students were learned and continuously succeeded to the decisive battle in Kyoto.

## **National assembly of Zenkyoto on Sept.5**

The more our struggle advances, the more the power concentrates and the stronger counter-revolutionary confrontation it prepares. The pre-attack to Waseda Univ. as lock out by the power and numerous duralumin sheers of riot police surrounded Hibiya park where Federal Zenkyoto Meeting was held are definitely explaining the above. We can convince that even under such circumstances we could firmly acquired the formation of the Federal Zenkyoto at Hibiya open-air music hall on that day.

Zenkyoto in individual university lead by 8 factions --SSL (Socialist Student League), MSL (Marxist Student League), SFL (Student Front of Liberation), AISC (Anti Imperialism Student Committee), Student International, Proletaria Student League, Communist Student League, SSF (Socialist Student Front)-- (continued on p.5)

had firmly fought individual campus struggle, on that day for the first time they combined nationwide, we acquired firm political will unification to the decisive struggle for anti-ANPO in Oct. and Nov. this year even though contradictory variance in some part.

The information that our comrade Yoshitaka Yamamoto, a chairman of Tokyo Univ. Zenkyoto, and a representative of Federal Zenkyoto, who had lead the death-defying decisive struggle at Yasuda Auditorium in Jan. had been arrested at the entrance of Hibiya Park before he tried to come in made us, more than 10,000 of students, get angry anew at the state power and on the other hand, definitely convinced them that meeting was not only a ceremony but a part of the process of the struggle for succeeding anti-ANPO and smashing Japanese imperialists. Among the hot air of student fighters who decided in their mind to fight decisively for coming anti-ANPO struggle, representatives from each factions and individual Zenkyoto seriously gave their statements.

## "Kyoto guerilla war" 9.20~22

As the struggle overcoming the boundary of precented campus struggle after "January Yasuda", this "Kyoto univ. decisive battle-the Kyoto Guerilla war fare" was ardently fought throughout three days.

The tactical boundary of campus struggle which was revealed in the "offensive and defensive battle at Waseda univ." is that we can not already strengthen our military corp only by passive death-defying (the desperate-defense inxxxx base) in our struggle against the state power's containment--individual defeat.

Not to wait for the coming of state power in our campus barricade, we ourselves must make a sortie from barricade and make containment offence against the state power. This change of campus struggle's form from defensive one to offensive one, we realized it in this three days battle.

20th noon, Okuda, the president of Kyoto university, issued an order for departure limiting time up to 21st early morning against Zenkyoto in barricade. But the Zenkyoto's military unit of Kyoto univ. who had repeated the various military training and had changed the quality of his armament from defensive one to offensive one appealed enthusiastically to offend containment against the state power, to all member 500 of all Kansai Zenkyoto who had happened to hold the rally.

For instance, they all made the accord of the will and started their action. About 2.00 i they at first blocked up all the gates of kyoto univ. with desks and lockers so that secured the whole establishment of the university as the sortie base and the ordnance store.

Then the Zenkyoto's leader began to divide the military unit to five troops and reorganized them to the "partizan groups" consisting of ten members. Finishing its work, they advanced into the two big street around of the university and made large barricades with motorcars and other goods. So they produced the "People's Liberated Quarter" in a moment.

A large number of non-sect students, workers and citizens jointed its battle, and moreover the hundred's member troop of Osaka Hansen military unit with red helmets arrived there and began to prepare immense fire-bottles.

The barricade was burned and the immense fire-bottles were exploded around of riot polices.... the circumference of the university was changed to the battle field of barbarious stone-fire war.

As the night going ahead, the ring of battle was extended and at last 5,000 peoples confronted in one body against the state power, but the arrested people were only 7 men.

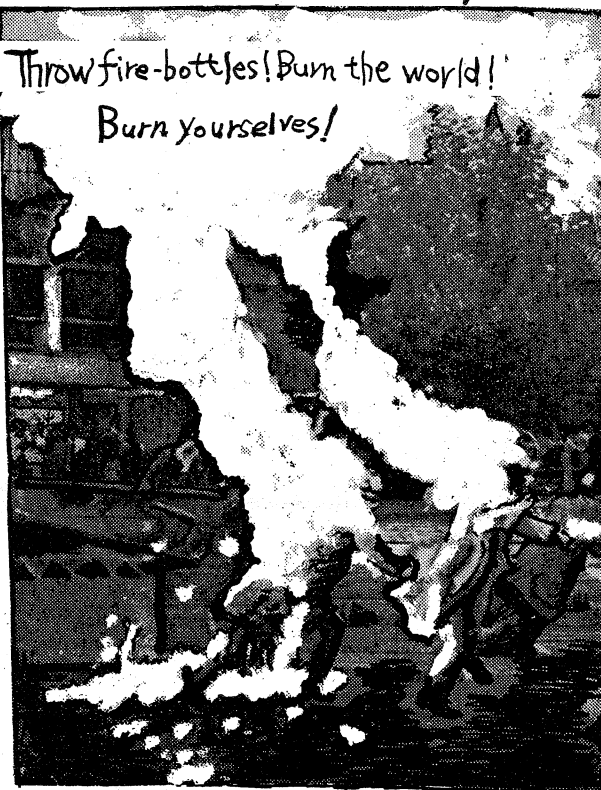

In the morning on 21th, the riot polices 3,000 rushed into the close of Kyoto univ. and began to destroy the barricades of ours and arrested 10 teachers who had resist to leave and then they charged the clock tower in which 8 soldier of Zenkyoto were in deaparate-defense with armament.

1.00 afternoon, in concert with the struggle of 8 soldiers, the big barricade was set up at Higashi-Ojicross point and the "Kyoto guerilla war" was held again.

A comrade of us was lost to death in this day's battle.

The night of 21th, the charge of riot police with powerful machines failed to brake down the clock tower's hold, because of fightful counter-charge of 8 soldiers and the prevention of partisan groups.

## comrades caught fire (Kyoto)↓

## 9.15 Hansen Rally

On Sept. 15th, nearly 5,000 young workers of all Kanto gathered at Meiji park to make sure of their resolution for the coming struggle and discussed with each other to clarify the present condition of Japanese class struggle which has been arriving into the epoch of the power struggle. One of the significances of this rally was that it gave a great chance to rebuild on organization of a nationwide worker's front in this autumn, following the establishment of a nationwide organization against ANPO on 9.5 Hibiya.

It is now widely recognized that Anti-War Youth Committee, which has led the severe class struggle with Zengakuren since the Hanedak battle on Oct. 8, '67, is an only integrated corps taking charge of the battle against ANPO in '70. (Anti-War Youth Committee has substantially overcome the People's Front Faction that tried to recover the anachronistic united front of Socialist and Communist Parties based upon an illusory ideology of "peace and democracy," consequently failing at the struggle against the Japan-US Security Treaty in 1960.) It is very natural that our proposition of Chu-den Massen Strike on Oct. 21 overwhelmed with positive confidence an abstract theory on general strike or a theory of wildcat strike.

## Battle at Nihon Univ. 9.30

The struggle at the Nihon Univ. is considered as one summit of campus struggle in 1968, while the Tokyo Univ.'s is the other one. The former would not accept any illusion "university community." They are now having classes at the Nihon Univ. under the guard of wire entanglement, riot police and the right-wing fascist.

September 30 in '68 was the day of victory that Nihon Univ. Zenkyoto succeeded in contradicting Chairman Furuta at mass collective bargaining and persuaded him to accept the 9-item request 30 thousands of the students. To our request, however, it was also the day of resentment that the national power represented by Sato interfered and spoiled our efforts.

What is called 'system for state emergency' prepared for this Oct.'s struggle against ANPO by the Sato administration, was most evident at the Nihon Univ.: the Meiji Univ.'s student hall, which was selected as a place for raising rally in Tokyo, was completely surrounded with armed motorcar and duralmin of riot police. On Sept. 30th, all of the 6,000 students belonging to the Nihon Univ. Zenkyoto and National Federation of Zenkyoto, set about an action, after the end of rally, under a slogan of 'recapture the Nihon Univ. 'Smash ANPO' 'Destroy the Japanese imperialism'.

This partisanship action was to break enemies transportation terminal and its measures after the "Kyoto guerilla war" a week before. However, because of the immaturity of our corps as an organization, and the lack of military training, we yielded against our will riot police's breakout of our rally, which resulted in more than 300 arresters. Compared with 75 arresters at the guerilla war in Kyoto, the number of 300 was too great a damage for us, and we have to deeply reflect on our tactical awkwardness.

Thus, the battle on 9.30 was not successful as a whole, but was carried out so aggressively as to turn the square around Ochanomizu station and Kanda area into a battle field of urban guerilla, to attack even the police office located in the area.

## Great United Action '70

The Great United Action was held on Oct. 10 for the purpose of final integration of all Japanese people's will and declaration of resolution for 10.21 ANPO pre-stage decisive struggle. There gathered more than 100,000 workers, students, and citizens, a half of whom filled always the Meiji Park in Tokyo with agitation, choral crying, and demonstration in scrumage.

A line of the demonstration reached as many as five kilometers in length, all the metropolis got involved in an enormous eddy of men appealing the smashing of the ANPO treaty and the victory of the battle.

Following this action, we will hold an armed central struggle against state power, (Tokyo Guerilla War--Tokyo Front of the World Revolutionary War) and revenge task forces that repeatedly threatened us at the rally on October 10.

# Explosion of Chuden's Massen-Strike in Osaka

This is a bill prepared for "10.3 ANPO strike whole spring rally" which was held October 3 in Kansai region (the west side of Japan). If Osaka Chu-dens "massen striki" has some strategic meaning for the above struggle against the ANPO has long been discussed among us since we set about the strike movement. The rally on October 3 was designed to make sure of the strategic meaning with all the common people, and to unite with each other for the coming severe struggle.

## I

To all citizens, students, and labourers in Kansai region: the battle against ANPO has already begun! The time of Prime Minister Sato's visit to the States and the expected agreement between the two have already been announced. Beside, the outline of public peace system to carry out the agreement has been revealed.

Beginning with Waseda University's struggle on September 3, students throughout Japan have been fighting to death in order to defeat their own made barricade. Thus the first round of the battle against ANPO was started at campuses where students tried to defeat ruler's attack.

We must help labourers to raise struggles with violence and make a more severe challenge to the existing system without isolating the student's barricade.

The battle against the Security Treaty, which was begun as Haneda Fighting on October 8 in 1967, has developed to force fighting by students and teachers in university; to "liberated district for people" in Sanrizuka that farmers created by building a wall against government officials. (the police) This shows that the battle against the Security Treaty is getting deeper than that in 1960.

And this can be ascribed to the fact that the people got the power to confront, with the ruling class to some extent.

However, in order to confront with rulers, or the Sato administration to full extent, we have to direct towards a battle which will completely dissolve various social systems based upon capitalism. Dissolution of university must lead to dissolution of factory, office, and all the other existing old organizations. And everything in society must be reorganized by labourers' unity's principle obtained through a struggle.

## II

We express such battle as "Chuden political strike (=the political base strike as the top of North Osaka armed dominating struggle and the whole rebellion office, campus and streets.)

This is surely a battle at producing process of workers and a strike strongly wished ardently for a long time since 1960. The point is that

this strike is absolutely different from a limited one, or the strike that allows rulers to return to old order only if they wait for the strike's ending. The strike should be once it starts, it lasts until the day of social revaluation.

All labourers, students, and citizens, desert your position! Refuse your duties for this bloody reign of bourgeois!

Let's focus our strength upon the battle to make a square for people of Northern Osaka, a center of Kansai region and an area crowded with (Chuden) the Central Telegram Office, the Central Post Office, the Kansai branch of J.N.K., a newspaper office, and so on.

Let's make a liberated district for people of Northern Osaka, town of offices and drinking places.

## III

We will never win the battle against ANPO unless we fight it out on such a fundamental ground's because that ANPO occupies the destiny of rulers in the world. In other words, it is that ANPO that has supported ruler's unreasonable pressure upon people for 25 post-war years.

A lot of suffering and tragedy forced upon people would not be made up for without breaking the ANPO.

The rulers in Japan are now confronted with a storm of anti-imperialism in many places of the world, because they have got too much money in cooperation with imperialists. In order to subdue this storm and become another boss of imperialistic whole capital, the Japanese rulers are going to make military police for the Asian people of us Japanese people.

(post script of editors)

On "10.21", We will burn Tokyo. It will be to get a step near the day of burning to death Japanese imperialists and burying the world bourgeoisies.

We will appeal to all the people as follow;

"Throw fire bottles! and

Burn the world, burn yourselves!"

We should throw the word "non-sense" against the "10.15 Anti-Vietnames War United Action of All the States". The action of anti-Vietnames war should be not but to dye White House in blood red with the flame of our fire-bottles.

Japanese bourgeoisies call us "a mass incendiary". This is correct. We will set fire to the whole world. Communist is a incendiary in a mean who scatters the fire-flakes around the world, lets the world revolutionary war win and burn away all forms of "capital and oppression" from this world.

ANPO in 1970, which is an agreement to be reached at Sato's visit to the States, means a further strengthening of the self-defense forces and establishing control right to Okinawa by the Japanese rulers. People in Okinawa, having suffered from American's domination for more than two decades, now face another new crisis of playing as Japanese ruler's spearmen.

## IV

We must absolutely reject such conspiracy; and this will be maintained by breaking not only ANPO but the ruling system made up of the Treaty

Towards this object we must burst out our indignation holded since twenty years ago, no, not twenty years but thousands of years of man's history.

We must represent people's agony since society was separated into those who dominate and those who are dominated. We are now ready to carry out; persistent resistance against rulers is spreading all over the world, such as in New York, Chicago, Bonn, Paris, Prague, Rome, Vietnam, and other many places in Asia, Africa, and Latin America.

It is our first task to establish the world of labourers and civilians.

## V

Let's prevent Sato's visit to States in order to win the 1970's battle.

Let's rulers be known that we are not sleeping pigs, machines running with oil, nor things controlled by the ruling side, but human beings with warm blood.

Oct.3th

All Kansai Strike Executive Committee.

Our every day's schedules, recently, have been to complete this paper and make immense fire-bottle which we'll use on Oct. 21th.

Now, Oct. 18th today, we have completed this paper with many error terms, and our task leaved is to prepare the final tactical plan and to make the accordance of our will.

It is unsufficient in fisical conditions but our mental conditions are surely sufficient.

Next number of this paper will be an extra issue about Oct.21 struggle.

Comrades, or communists of the whole whole world# We send this for you as a fire flake yet small.

Oct.18th pm 4.00 (N.Kajiii)
